

## ACORN TAG

Specialist benefit denial tag for jewelry, watches and accessories.

The Acorn tag is a great, low cost way to protect smaller merchandise. The tag is prominent enough to provide a strong visual deterrent and lightweight enough to allow the customer to inspect and try on the item.

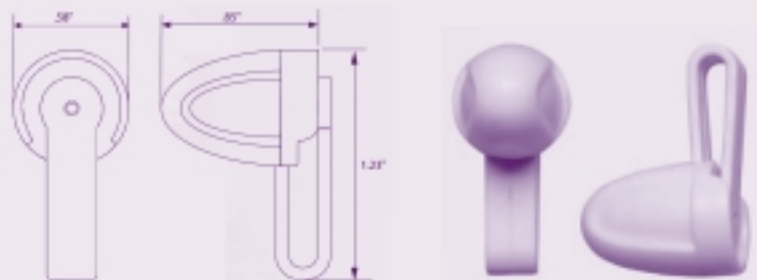

This specially designed non-electronic tag can be used as stand alone protection or as a complimentary security tag integrating with any EAS tagging system already in use. The Acorn tag is quick and simple to attach but cannot be removed without damage to the item without the correct detacher.

The Acorn tag is manufactured in lightweight and durable ABS

### Specifications

**Weight :** 0.28gms  
**Pull force :** Up to 180lbs.  
*(And diagram with measurements)*

The Acorn tag is compatible with most manufacturers' detachers.

## TD (THEFT DETERRENT) LABEL

The positive deterrent effect of tagging and labeling goods is well proven. However, sometimes it is neither possible nor cost effective to tag small merchandise and accessories that are openly displayed. These items tend to be an 'impulse purchase' and consequently attract a higher level of loss.

The TD Label is a smart, simple and cost effective way to protect these items. We have designed a miniature facsimile of a 'live' tag circuit, and incorporated it into the reverse side of the label; clearly visible through the label. It is undetectable and indistinguishable even to your trained staff from a 'live' tag and combined with effective signage, offers ????

**Simple, and it works.**

**Intelligent Security, Inspired Solutions**

### Technical Information

**Label Size :** 23mm x 15mm

**Roll Size :** 1000 labels per roll
