

**Ellipse 2020** system is a new generation of anti-shoplifting equipment based on advanced electromagnetic (EM) technology. The Ellipse 2020 features a Digital Signal Processing (DSP) control and Switch Capacitor Filtering (SCF) to deliver accurate and reliable detection.

**Ellipse 2020** system is specially developed to be installed in book, drug, perfume, and giftshops. Its streamlined design integrates effectively into any environment.

**Ellipse 2020** system takes full advantage of the latest advancements in the field of electromagnetic technology in both electronics sophistication and antenna design.

**Ellipse 2020** system is engineered with advanced technology which ensures optimum protection of all secured merchandise in any environment.

**Ellipse 2020** system uses a wide variety of EM tags with a maximum of 1.2 m between the antennas.

**Ellipse 2020** system is constructed in polyurethane with a dove grey finish. An alarm/people counter is available as an option.

**Ellipse 2020** system is a fully digital configuration.

**Ellipse 2020** system has the following dimensions:

height	181.2 cm
top width	46.0 cm
bottom width	74.8 cm
depth	4.4 cm
weight	22 kg
