

SYSTEM 9000F/PL

↘ **System 9000F/PL** is an aesthetic progression of the System 9000F. Utilising the same state of the art RF (Radio Frequency) technology. Combining RF micro electronics, DSP (Digital Signal Processing) and DCT (Dynamic Communication Technology) to advance performance, reliability and detection.

↘ **System 9000F/PL** has been specifically designed for fashion retail and department store applications, where a discreet antenna is a design priority. The architectural construction in clear and durable Plexiglass, will appeal to store designers whilst retaining the maximum deterrent value offered by it's advanced electronic system for the retailer.

↘ **System 9000F/PL** is available in 3.25, 4.75 and 8.2 MHz versions with a wide choice of either hard or soft tags, operating at a maximum width of 2.5 m between antenna.

↘ **Exclusively**, optional logo placement within the standard system configuration allows the retailer to reinforce brand awareness.
