METAL GUARD COMPLIES WITH DfES GUIDANCE FOR SCHOOLS

Static knife and metal detection antenna

Metal Guard detects any unusually large metal objects passing through the pair of floor mounted antenna, such as knives, guns and other weapons, as part of the school disciplinary power and duty to manage risk.

The System is typically linked to a remote alarm pager and/or CCTV system, which is then triggered by any large metal object passing through the antenna. This alerts through the associated Pagers or CCTV system, without triggering any alarm at the point of entry or exit, so that the offender is unaware that an alarm has been triggered by them. This allows staff to search the offender, according to DfES guidelines.

Metal Guard is a market leader in metal detection. The system is highly sensitive, so as well as the ability to be sited near metal doors, can be tuned to ignore 'legal' metal items, such as rulers, staplers etc. The deterrent value of physical antenna, without obvious alarms to warn an offender, increase the systems' effectiveness.

Features:

- Quickly screens for metal objects such as knives
- Audio, pager and LED alert function
- Headphone connection also available
- Revolving and sliding door filter
- Multiple configuration possible

Dimensions:

- Glass Clear Economy - 18cm wide.
- Glass Clear Deluxe - available in 3 sizes: 12/18/24cm wide

IntrepidLibrary

Intrepid Library supplies and maintains a unique portfolio of systems to protect all types of library media. With over 30 years experience in library and museums and public buildings of all sizes we have a unique insight and understand that there is no one size fits all solution.

Our independence enables us to offer impartial advice, based on your specific needs and to work with each client to provide a viable solution that works.

We are constantly sourcing, researching and trialling new systems from the industry's most innovative developers and designers, in addition to our own in-house R & D, to ensure that we can offer you the best loss prevention solutions, including:

- **EAS:** tagging from the world's leading manufacturers across all technologies. We also supply, labels and alarms for any manufacturer systems.
- **CCTV:** The Highest definition cameras with mobile apps for dial in capabilities enabling you to see your business 24/7, from anywhere in the world.
- **People Counting:** All types of people counters, from simple battery operated to IT integrated software, which can be fully customised for your own requirements. Remote access and real time reporting.
- **Access Control:** Software integrated, stand alone and unique RFID solutions.
- **Digital Team Communication:** Reliable team communication for up to 30 users. No battery packs or cables, just smart lightweight headsets that let you communicate over an area of up to 200,000 sqft.

Our focus is and has always been on quality, independent technical advice and customer support.

INTREPID LIBRARY

We are constantly sourcing, researching and trialling new systems to ensure that we can offer you the best security for your library.
