

APPAREL GUARD

DETECT UNAUTHORISED DETACHERS IN FITTING ROOMS

EAS tagging has been proven as the most cost effective method of reducing stock loss and has been in use in the UK for almost 40 years. However, because detachers are now available to buy on the internet, anyone can legally purchase them and then have the means to remove tags unlawfully to shoplift.

MetalGuard, whether antenna or integrated into your EAS system, will of course detect illegal detachers as well as foil lined bags used for shoplifting, ApparelGuard utilises the same technology as MetalGuard to detect illegal detachers. If your store doesn't use these then ApparelGuard is the solution to prevent tag removal in fitting rooms.

Utilising the same technology as MetalGuard, ApparelGuard detects changes in the local magnetic field caused by a deatcher and covertly triggers an alarm to pagers, radios or any other communication device that is used in-store.

Using Cat5e cables to power each antenna, the system can power maximum 11 antenna ('pods') from the controller, which can be managed from a central PC.

ApparelGuard focuses on detecting detachers with size equal to or above XT, Superlock and Hyperlock.

Antenna Distances and information:

- Maximum distance is 1,4 meters between each antenna box (this is a standard aisle width in a fitting room).
- Each controller can power a maximum of 11 antennas (pods), covering 10 fitting rooms.
- Maximum distance for the antenna cable is 40 meters from the controller to the last antenna.
- Retailers can use 3 dry relay contacts as alarm outputs, using a maximum DC 24V, or push the alarms to EAS controller using API.

INTREPIDSECURITY

Intrepid Security supplies and maintains a unique portfolio of systems to prevent stock loss and protect profits, supporting a healthy, profitable, business. With over 30 years experience in retail, library and distribution companies of all sizes and in all market sectors, we have a unique insight and understand that loss reduction cannot be sold as a one size fits all solution.

Our independence enables us to offer impartial advice, based on your company's specific needs and to work with each business to provide a viable solution that works. We supply companies large and small including many of the high streets' best known stores as well as the world's most famous department store.

We are constantly sourcing, researching and trialling new systems from the industry's most innovative developers and designers, in addition to our own in-house R & D, to ensure that we can offer you the best loss prevention solutions, including:

- **EAS:** tagging from the world's leading manufacturers across all technologies. We also supply tags, labels and alarms for any manufacturer systems.
- **CCTV:** The Highest definition cameras with mobile apps for dial in capabilities enabling you to see your business 24/7, from anywhere in the world.
- **SmartTrack Camera:** 360° Vision with the world's only Automated Twin Camera carriage track CCTV system. Ingeniously concealed, this travelling motorised system utilizes pan, tilt and zoom track cameras that glide undetected along a track. Silent, swift and precise
- **Access Control:** Software integrated, stand alone and unique RFID solutions.

Our focus is and has always been on quality, independent technical advice and customer support.
